

GEORGE CREEK DISTRIBUTION SYSTEM

** 1970 ASSESSMENT **

\$ 1,400.00

BASIS OF ASSESSMENT:

This Distribution System is now assessed according to the Commissioner's report of water used in the previous year by each individual water user. Note: High water rights will be assessed only if the high water is delivered to proper rights. The peak flow of George Creek did not rise above 66.00 CFS, therefore, high water rights are not to be assessed.

CALCULATION OF ASSESSMENT:

The 1970 minutes state the 1970 Assessment is to be in the amount of \$ 1,400.00 with the 1968 years usage of water to be the basis of the 1970 Assessment. Therefore, \$ 1,400.00 divided by 2,374.00 acre-feet of water equals \$0.589721989, cost of one pro-rata acre-foot of water times that amount of water diverted by each listed user on the system equals their pro-rata share of the 1970 Assessment.

PROOF:

Acc't No. 1 George Creek Irr. Co.

1,397.00 Ac/ft times the rate equals \$ 823.84
(\$0.589721989)

Acc't No. 2 Wallace Spencer

977.00 Ac/ft times the rate equals \$ 576.16
(\$0.589721989)

TOTAL 1970 ASSESSMENT \$1,400.00
